

PUBLIC ANNOUNCEMENT

The Government of Rwanda, through the Ministry of Agriculture and Animal Resources (MINAGRI), and in collaboration with the International Fund for Agricultural Development (IFAD), is in the process of designing a specialized regional programme titled “Dairy Intervention for Mitigation and Adaptation (DaIMA)” to complement and enhance green and climate-resilient investments under the Rwanda Dairy Development Project – Phase II (RDDP2).

As part of the program design, an Environmental and Social Management Framework (ESMF) has been developed and is subject to public disclosure and consultation according to international best practices for environmental and social risk management.

In this regard, MINAGRI cordially invites the general public to review the ESMF and provide their feedback in the form of questions, comments, suggestions, or requests for clarification before the document is finalized.

An electronic version of the ESMF is available on the official websites of MINAGRI, SPIU, RAB, and all District Offices, whilst hard copies can be accessed at the RAB/SPIU Head Office (located at the Blue Star House, Kacyiru Sector, Gasabo District, Kigali City) from Monday to Friday, between 9:00 AM and 5:00 PM.

Feedback, comments, clarification, or suggestions shall be channelled through infospiu@rab.gov.rw not later than 30th May 2025.

Sincerely

Dr. Olivier KAMANA
Permanent Secretary
